

Hello

MY NAME IS THERESA

I am extremely passionate about home-based care and for me it's about the quality of childcare for all preschoolers that motivates me to offer parents the best option for their little ones.

ABOUT ME

I am originally from South Africa and I live in Unsworth Heights on the North Shore with my husband and two amazing children aged 21 and 25. Our spare time is filled with family activities and enjoying the company of a wide network of friends. I have been a caregiver with Fairy Godmothers for six years.

MY HOME-BASED CARE

I am extremely passionate about Home-based care and for me, it's about the quality of childcare for all preschoolers that drives me to offer parents the best option for their little ones. Home-based care allows the children to enjoy the experience of fun, safe, and individualized care, while still gaining the benefits of quality preschool education. The small child to teacher ratio gives parents the confidence to easily move towards home-based care as their first option and to feel comfortable and enjoy the close attention to each child's needs.

FAMILY BONDS

Past and present students integrate into our family as a whole and form lasting bonds. They enjoy equal measures of time indoors and out with an education environment much the same as they would find at home. Their learning is individualized working within the needs of each child. Old school values of manners, sharing and caring for each other and the environment form part of their integrated learning. The various ages facilitates a "family" like place for them. When parents are already stressed about having to go to work they can be assured that their little ones are in an environment as close to home life as I can make possible.
